[Fortified Rice Traceability Application]

User Manual for Manufacturers of FRK

A manufacturer of FRK receives premix powder from premix manufacturers and rice flour from suppliers/other manufacturers. Using these two ingredients, FRK kernels are manufactured and tested and approved FRK kernels will be dispatched to Miller.

1.1 Process:

The key functionalities that occur at FRK level is as described below.

1. There will be 2 roles at FRK vendor level, admin has access to both.
 - a. **Approver:** Who receives Premix lots and acknowledge and verify the lot quality and get it tested at lab if required and finally either approve the Lot or reject the lot
 - b. **User:** Who creates Rice flour batches and FRK batches and send sample to lab and dispatch the approved batches to Miller.
2. **Addition of Raw Materials into the organization/portal:** While procuring the raw materials (Rice powder) from suppliers, the details of procurement need to be added in this portal as well. These details are used at the time of FRK batch creation. User can choose the list of raw materials added as input at the time of Premix batch creation. Similarly, another key raw material (premix powder) will be procured from premix vendors. Once the Lot is dispatched from Premix vendor, it will be populated to FRK vendor under Lot Dispatched category. After receiving the Lot, the approver from FRK Vendor will acknowledge that the lot is received and further, can review the lab reports of the premix powder in Lot details page and if lab reports are satisfactory, the lot can be approved. If the Lot lab report is not good, the approver can send sample to Lab and get latest lab report and based on the report, the lot can be approved or rejected automatically. The rejected lots will be sent back to Premix vendor and approved Lots will be used in FRK Batch creation as input raw material.
3. **Creation of Batch:** Once raw materials are added, user can create a FRK batch where raw materials that are used in the batch will be taken as input and a batch will be created in the application.
4. **Sending sample to the Lab:** After a FRK batch is created, a sample needs to be sent to Lab. Once the lab tests are completed, lab report will be auto populated in FRK batch details page. If lab result is positive, FRK user can view the updated stage as 'Batch ready to be dispatched' automatically, now FRK user has to add packaging info and dispatch the lot to MILLER Manufacturer. If lab report is unsatisfactory, automatically FRK user can view the updated stage as 'Rejected' and should not be able to send any lot to MILLER manufacturer.
5. **Dispatch:** Once the Batch ready to be dispatched, User can prepare packaging bags details in the batch details page and dispatch a few/all bags to miller manufacturer.
6. **Acknowledgement from miller Manufacturer:** Once dispatched material is received by miller manufacturer, they may review lab report, may go for additional lab testing of the FRK and accept the material. If lab report is unsatisfactory, automatically that lot is rejected and miller manufacturer can send it back to FRK manufacturer.

The functionality related to FRK manufacturer is described in the next section.

1.2 Login:

To log into the system as a FRK admin, go to the “FoSCoS” portal by using the link: <https://FoSCoS.fssai.gov.in/>

A FoSCoS Home page will be displayed as shown in the figure below.

Figure 1: FoSCoS Home page

- Click on the “**Login Food Businesses**”
- Enter the **License/Registration/Application number:** - Enter a valid License/Registration/Application number
- Click on “**proceed**”
- **Enter password:** - Enter a valid password
- **Enter Captcha:** - Enter the Displayed Captcha
- To continue click on the **Sign-in** button.
- **Verification Code:** Enter the verification code that you received in the registered Mobile number/Email. User will be navigated to the FoSCoS Dashboard page as shown in figure below.

Figure 2: FoSCoS Dashboard page

- Click on the “**Issued**”
- Click on the “**Issued – License**” Expandable button.

User will navigate to the page as shown in figure below:

Figure 3: Login page

- Now click on the “**Login to FRQMS**”
- User will be navigated to the **FRQMS** landing page.

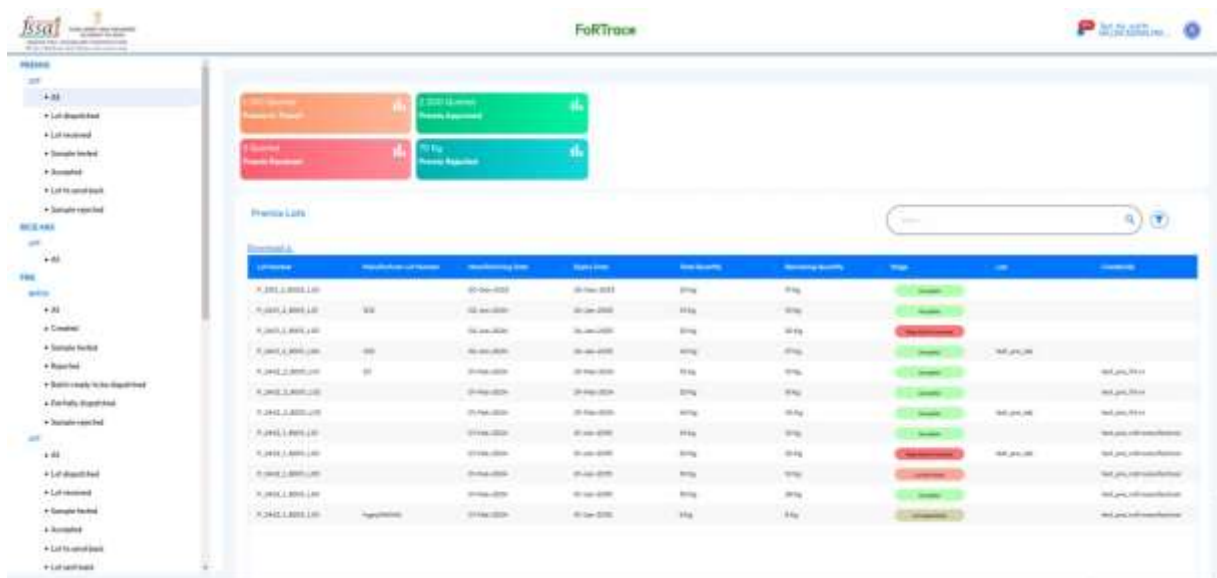

Figure 4: FRQMS Landing page

1.3 Lot Approval by Admin:

- (i) Click on All/Lot dispatched from side menu, Admin can see list of lots that are present at FRK from premix vendors.

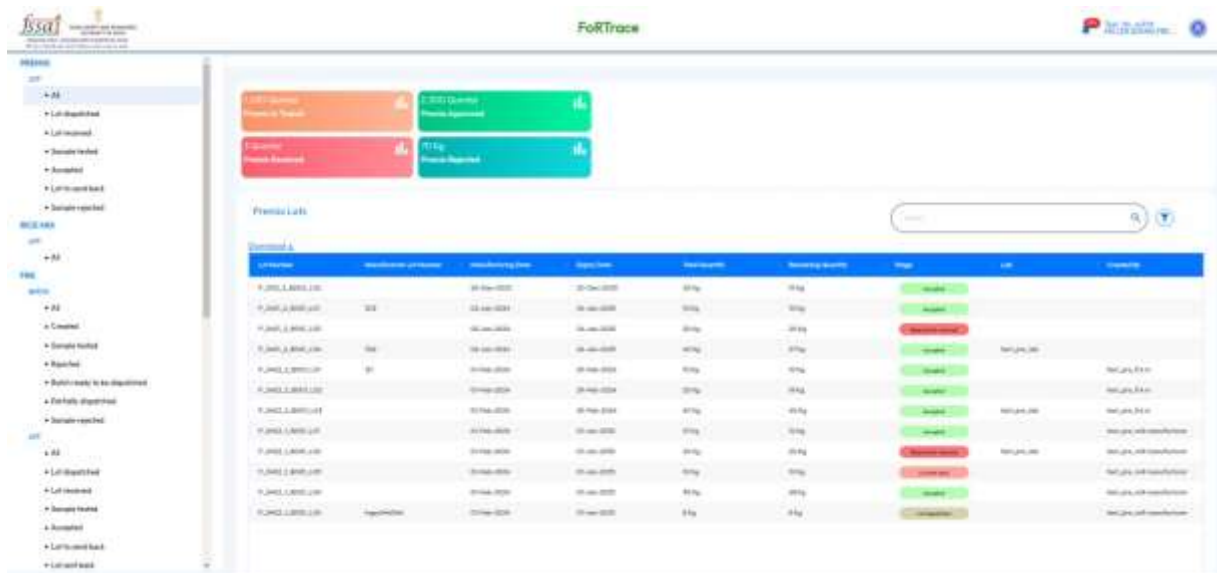

Figure 5: Details of dispatched lot

- (ii) Click on a lot dispatched, user will get PREMIX LOT DETAILS page.
- (iii) To acknowledge lot is received, click on **Lot Received** as shown in below image. It updates the status of Lot from Lot dispatched to lot received and Premix vendor will also get the updated status of Lot that lot is been received by FRK.
- (iv) User needs to enter the date on which lot is received and comments (if any) and click yes on

popup while acknowledging that lot is received. A prompt will be shown that lot is received.

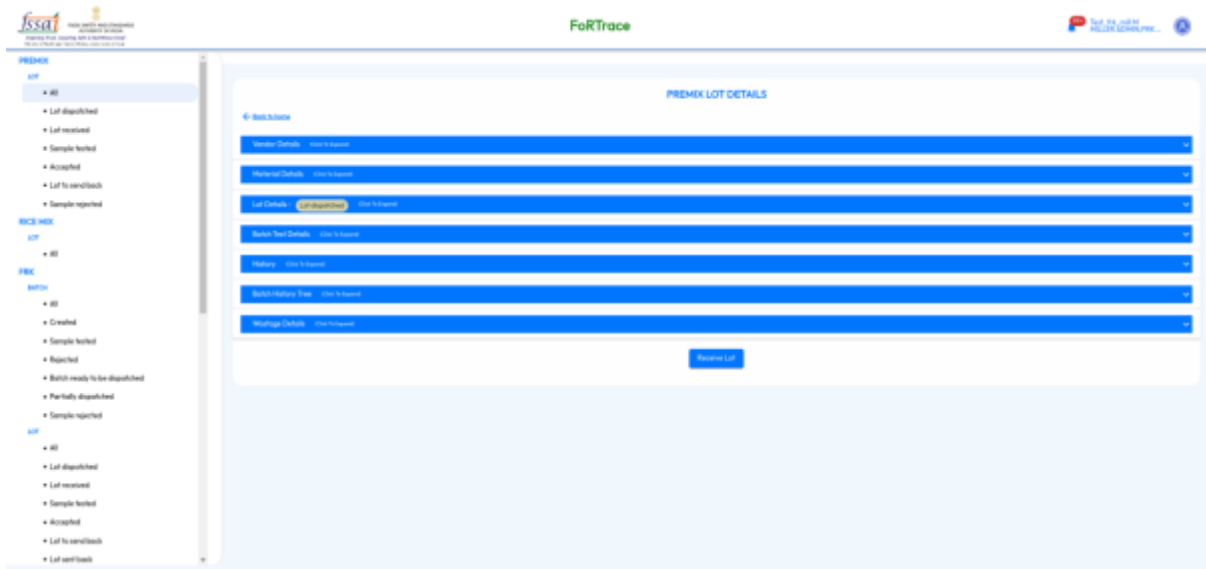

Figure 6: Premix lot details page

Figure 7: success toast message of receiving lot

- (v) Clicking on lot received from left side menu populates list of lots acknowledged by admin.

Figure 8: Premix lots received

- (vi) Click on lot to see lot details page with possible actions of ‘**Sample send to lab**’, ‘**Accept**’, ‘**Test rejected ready to send back**’ as shown in below image.

Figure 9: Option for FRK admin to accept, reject or send sample to lab for premix lot

- (vii) If user clicks on **send sample to lab**, the sample will be sent to lab and lab will do necessary tests and publish the test report.
- (viii) If the lab report is satisfactory, automatically admin user can see the lot stage as ‘Accepted’ and if the report is unsatisfactory, automatically admin user can see the lot stage as ‘Rejected’ and admin can sent back by clicking on ‘send rejected lot’.
- (ix) After clicking on **Test rejected Ready to send back**, an action will be shown on lot details page as ‘send rejected lot’. Clicking on it will send the lot back to premix vendor.
- (x) If the user clicks on **Accept** button as shown in above image. Then one popup will come, here user can enter approved date, enter comments and click on Accept. Again, one confirmation popup

(xi) Then success notification message will be shown as lot has been accepted and is available for use as shown in below image.

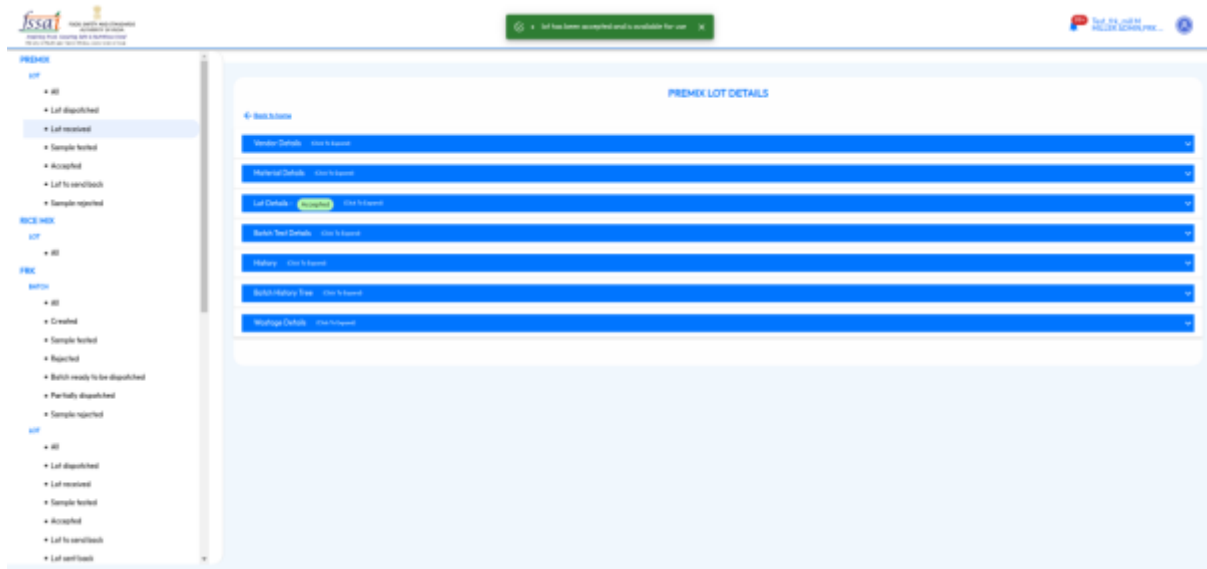

Figure 10: Success message for accepted lot

(xii) Clicking on **Accepted** from left side menu will populate all lots that are approved by admin

The screenshot displays the FortTrace software interface. At the top, there are logos for ISSA1 and FortTrace. The main area is divided into several sections:

- Summary:** A top section with four colored boxes showing key metrics:
 - Energy Demand: 1,000,000 kWh
 - Power Demand: 1,000,000 kWh
 - Energy Reported: 1,000,000 kWh
 - Power Reported: 1,000,000 kWh
- Process List:** A table listing various processes with columns for Name, Location, Status, and Action. The table is filtered to show only 'Active' processes.
- Process Details:** A detailed view of a selected process, showing a timeline of energy and power consumption over time. The timeline is divided into segments representing different energy sources or processes.

Figure 11: List of Premix accepted lots

1.4 Key features of FRK Admin:

On successful login, user will be navigated to below landing page.

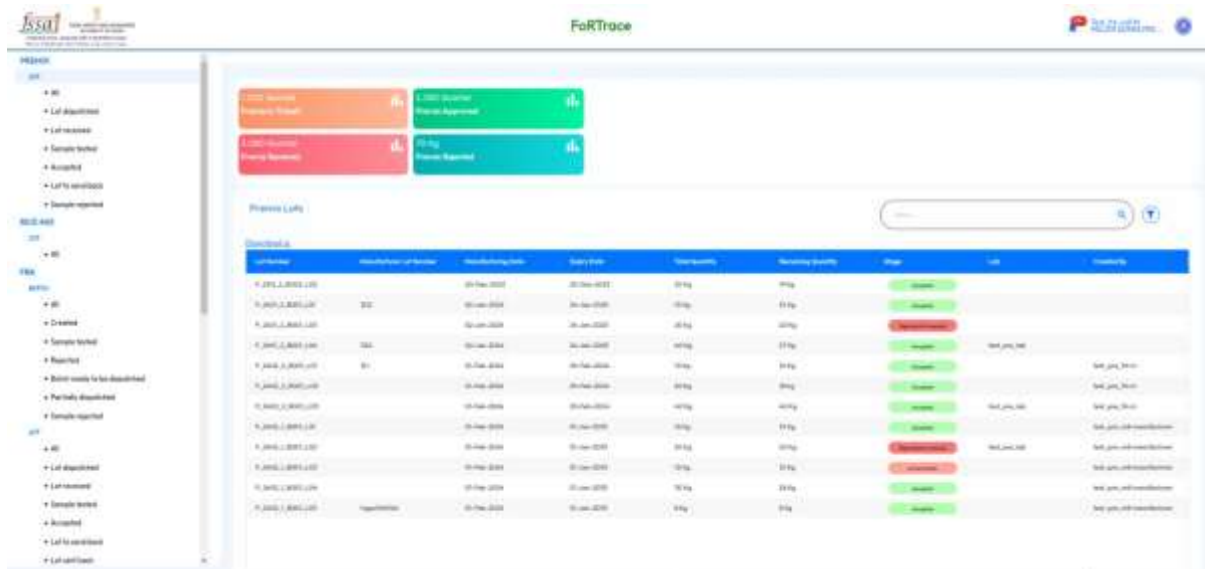

Figure 12: Landing page of FRK admin

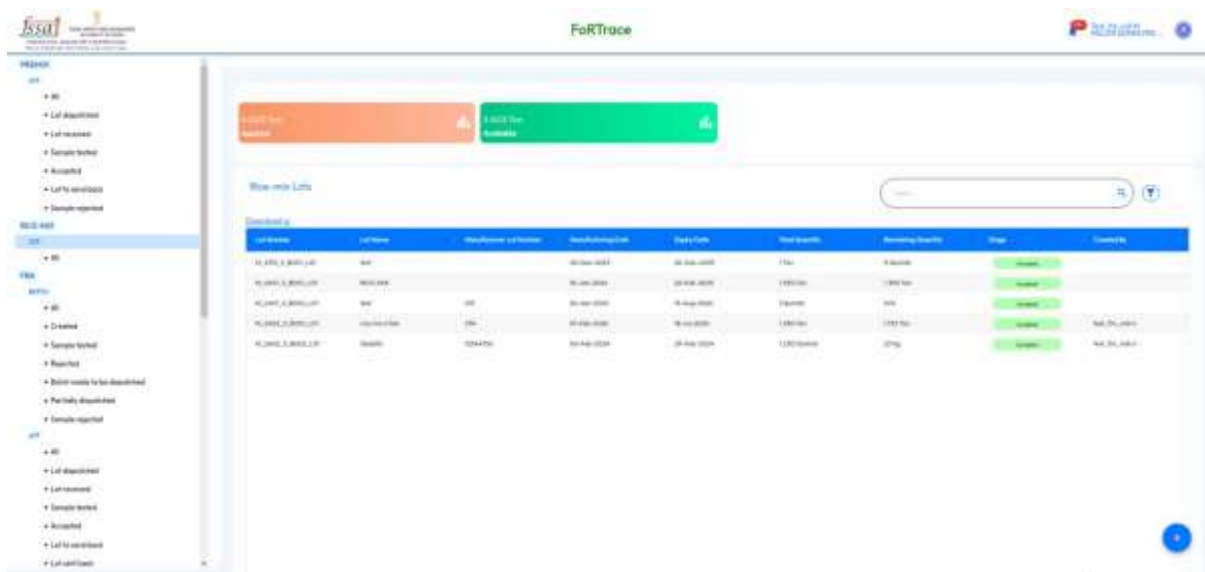

Figure 33 (a): Creating Rice Mix (Raw material for FRK)

Admin can download the rice-mix table data by clicking on **Download** button.

1.4.1 Creating Rice Mix:

Click on Rice Mix in the side drawer of the landing page, a Grid will be displayed on the screen with a '+' icon at bottom right.

On clicking '+' icon, a form will be displayed as shown below. Then click on 'Add new vendor' button, a popup form will open as shown below

The user needs to fill the details in the form which consists of:

Vendor Details:

- a) **Name of the vendor:** Name represents manufacturer/supplier name.
- b) **Vendor type:** Choose the type of vendor whether manufacturer or trader or broker.
- c) **Email Id:** Enter mail address of the vendor.
- d) **Mobile Number:** Enter mobile number of the vendor.
- e) **Address Lane one:** Enter the address of the vendor.
- f) **Address Lane two:** Enter the address of the vendor.
- g) **Pin code:** Enter pin code of the vendor.
- h) **Country:** Select country.
- i) **States:** Select state.
- j) **Districts:** Select districts.
- k) **Village/City:** Enter name of the village/city.

On clicking on “**Vendor with FSSAI license number**”, a form will appear as shown in below images where user can search License number of the vendor and details will be auto filled in the vendor details.

Lot details:

- a) **Name:** Enter name of the rice-mix.
- b) **Raw Material Type:** Enter type of rice-mix used in FRK creation.
- c) **Manufacturing Lot Number:** Enter manufacturing lot number (if any).
- d) **Batch no (Auto Generated):** Batch number of rice-mix will generate automatically.
- e) **Manufacturing date:** Select manufacturing date of rice-mix.
- f) **Expiry date:** Select expiry date of rice-mix.
- g) **Percentage to be used in mix:** Mention the percentage of rice-mix to be used in FRK batch.
- h) **Total quantity (in kg):** Enter quantity of raw material in kg.
- i) **Rice Type:** Choose rice type procured from the vendor (raw / boil).
- j) **Attachments:** Add any attachments/rice-mix reports that are associated with rice mix.

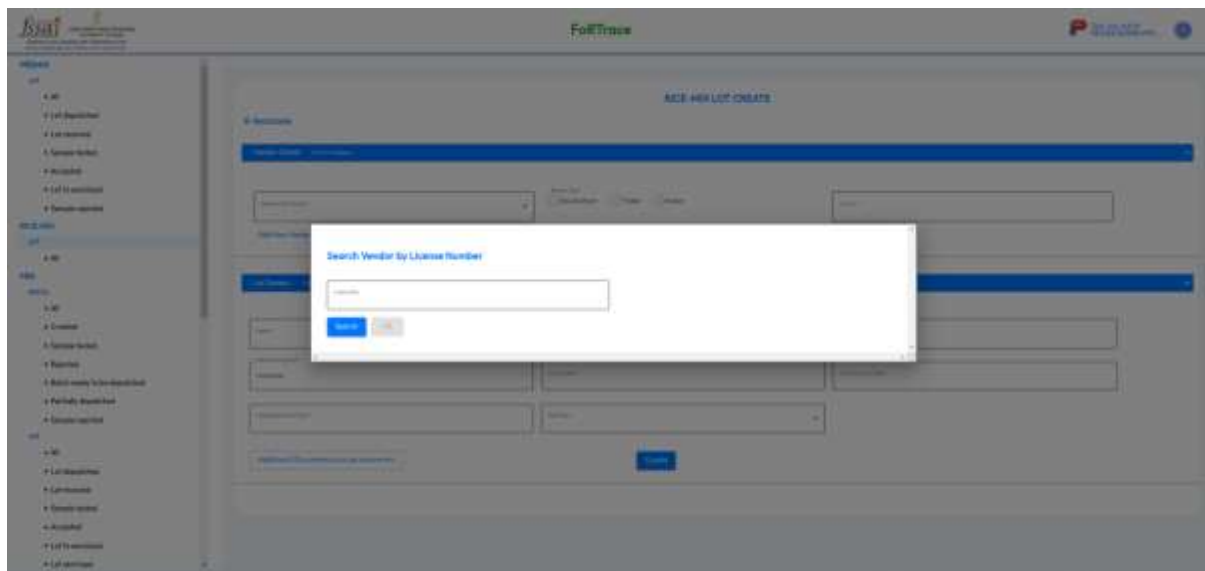

Figure 16: Form after clicking **Vendor with FSSAI license number** button

Once all the data pertaining to the procured raw materials/rice mix is added. Click on the **create** button as shown in figure above.

On successful creation of lot, a confirmation message will appear on the screen as shown in figure below.

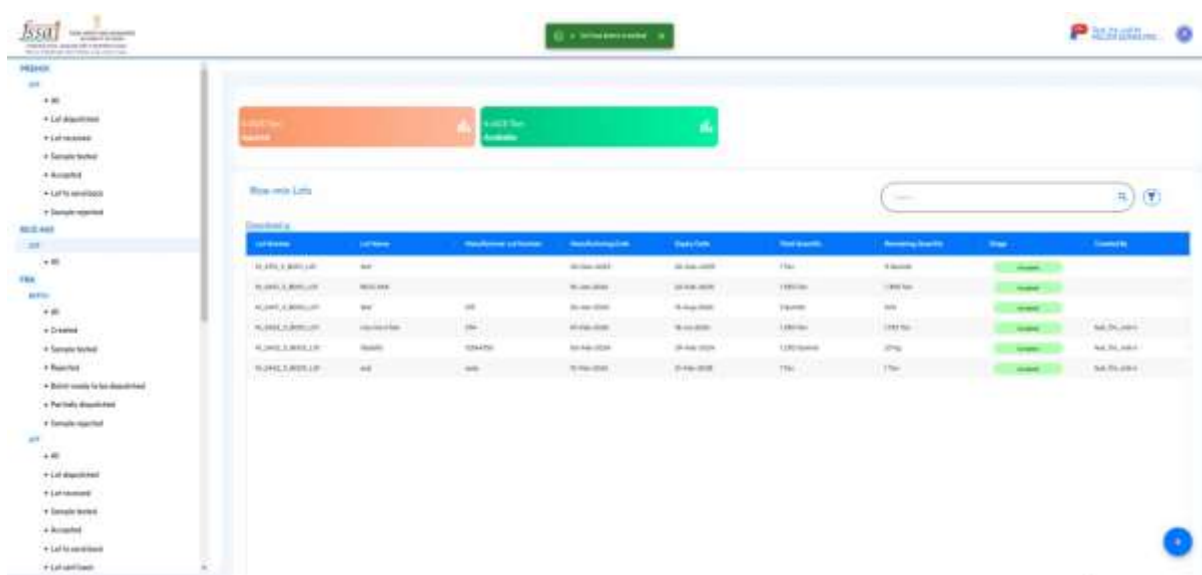

Figure 17: Success toast after creating of rice mix lot

1.4.2 Creating batch

- (i) To create a batch, click on FRK tab in the side drawer of the landing page as shown in figure below. A grid will be displayed on the screen with a '+' icon at bottom right.

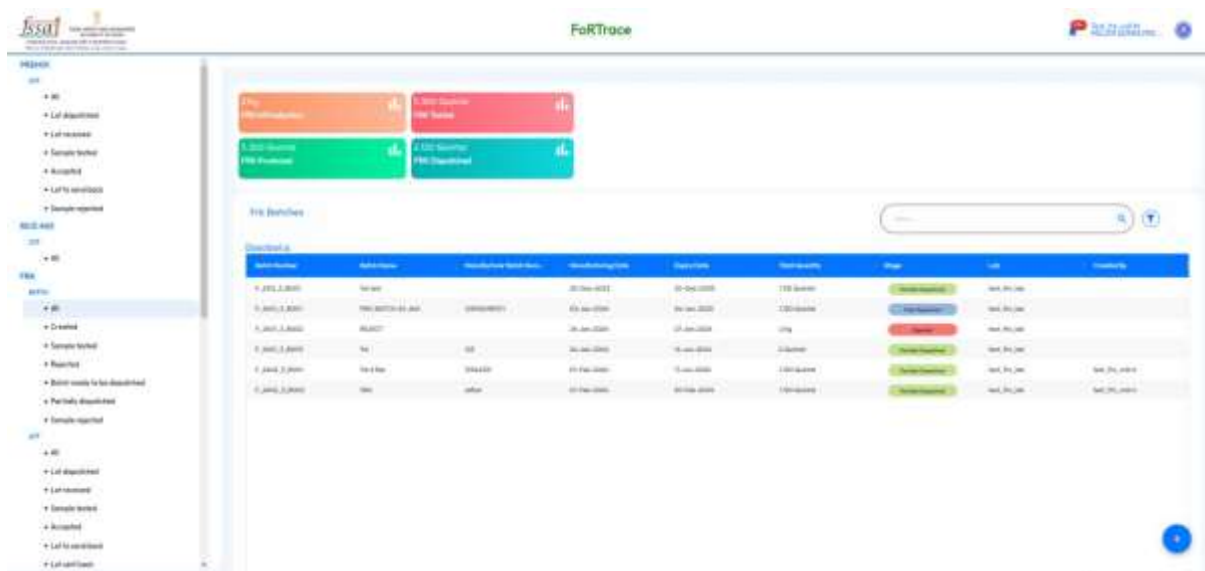

Figure 18: Creating FRK batch

- (ii) On clicking ‘+’ icon, a form will appear as shown above. The user needs to fill in the form details which consists of:

Vendor details: -

- Name of Vendor:** Name of your organization is populated,
- FSSAI License:** FSSAI license number is auto populated,
- Vendor type:** Select vendor type,
- Address:** Vendor address is auto populated,

Select checkbox if Manufacturer is accredited by any agency

Batch details:

- Name:** enter name of the batch,
- Manufacturing Batch Number:** Enter Manufacturing Batch Number (if any).
- Batch No:** batch number will generate automatically.
- Manufacturing date:** Enter manufacturing date.
- Expiry date:** Enter expiry date.
- % to be used:** Enter percentage of this FRK to be used at Miller manufacturing time.
- Total quantity (in Kgs):** Quantity of FRK generated under this batch.
- Material details: -** Click on add rice mix and premix and select the rice mix, premix to be consumed under this batch & enter quantity & select units.
- Instructions:** Enter the instructions that FRK manufacturer should be notified at the time usage of this premix powder as raw material in FRK generation.
- Attachments:** User can upload material specification sheet and technical specification sheet and any additional attachments that are associated with Premix powder.

Figure 18: FRK batch create page

After entering the batch details in the form, click on the **create** button as shown in figure above.

On successful creation of batch, a confirmation message will appear on the screen as shown in figure below.

Figure 20: Success message for creation of FRK batch

In the left side menu under Batch, the user can see created batches in **All** and **Created** options as shown in figure below. The “**All**” tab displays a consolidated list of all batches under various categories such as created, sent to lab for testing. Testing done, accepted, rejected etc. Under “**Created**” tab, a list of the batches created by the user is displayed.

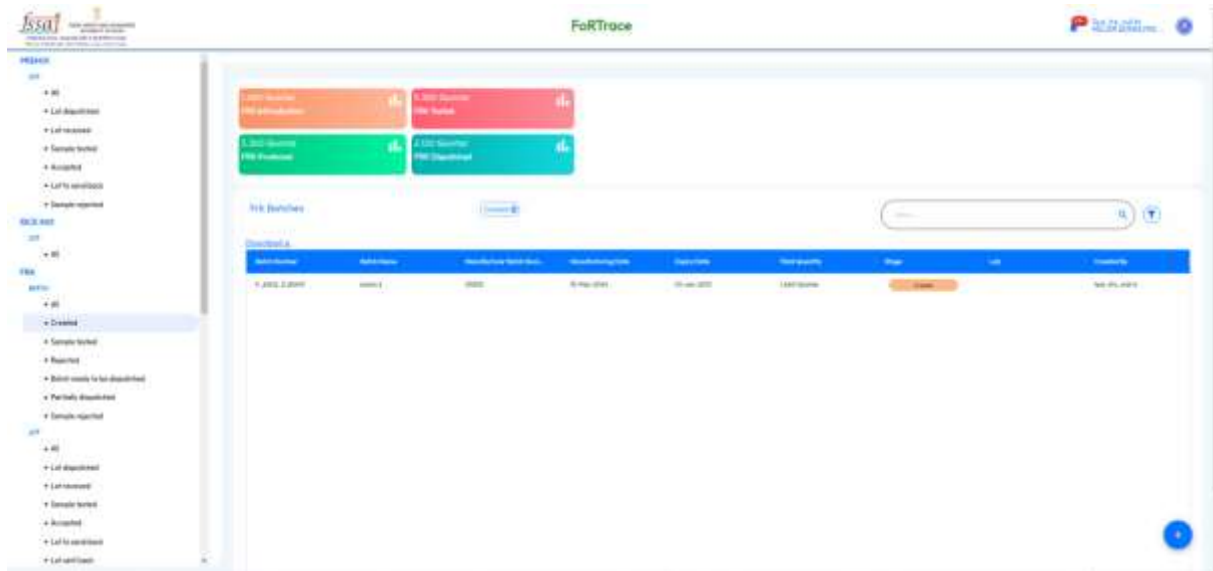

Figure 21: Displaying created FRK batches

1.5 Send samples for lab testing

The FRK manufactured in a specific FRK unit needs to be tested in designated laboratories.

- (i) To send the manufactured sample to the lab, click on the created batch from the grid and the batch details page is displayed.
- (ii) Scroll down to the end of the batch and click on 'Send Sample to Lab' button and enter the date, select lab name and comments and click on submit button.
- (iii) This will initiate the process of dispatching the sample to the lab in offline mode.
- (iv) An acknowledgment will be sent by the lab, once the Lab receives the sample and lab reports will be published after performing the lab tests.
- (v) If sample sent is in damaged condition, Lab may reject the sample and FRK manufacturer may need to resend the sample using above process.

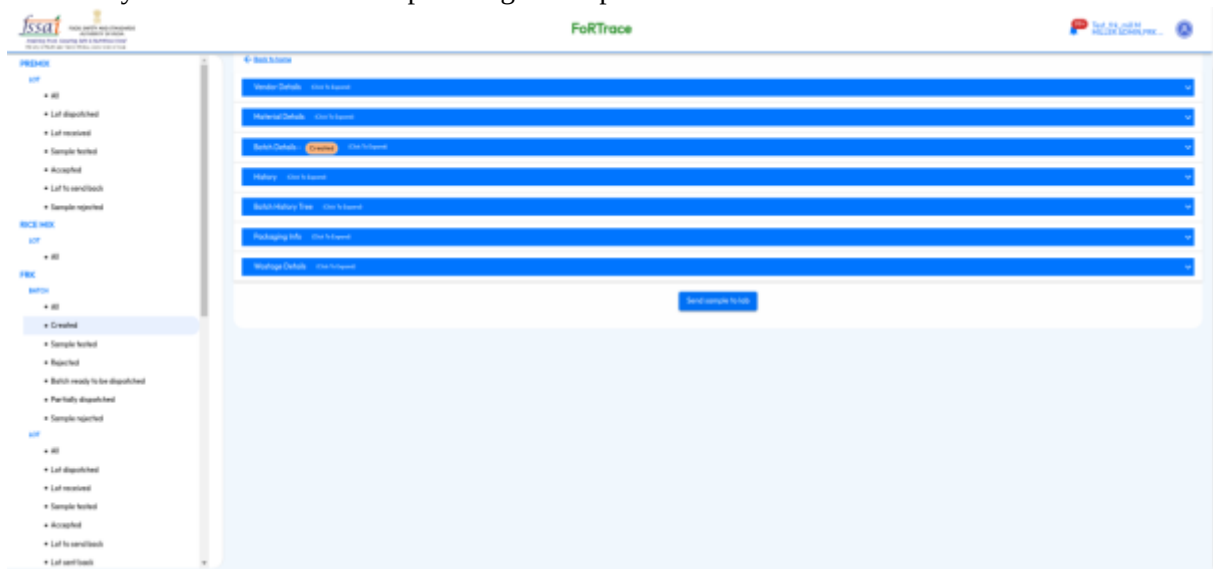

Figure 22: Sending sample to lab for testing

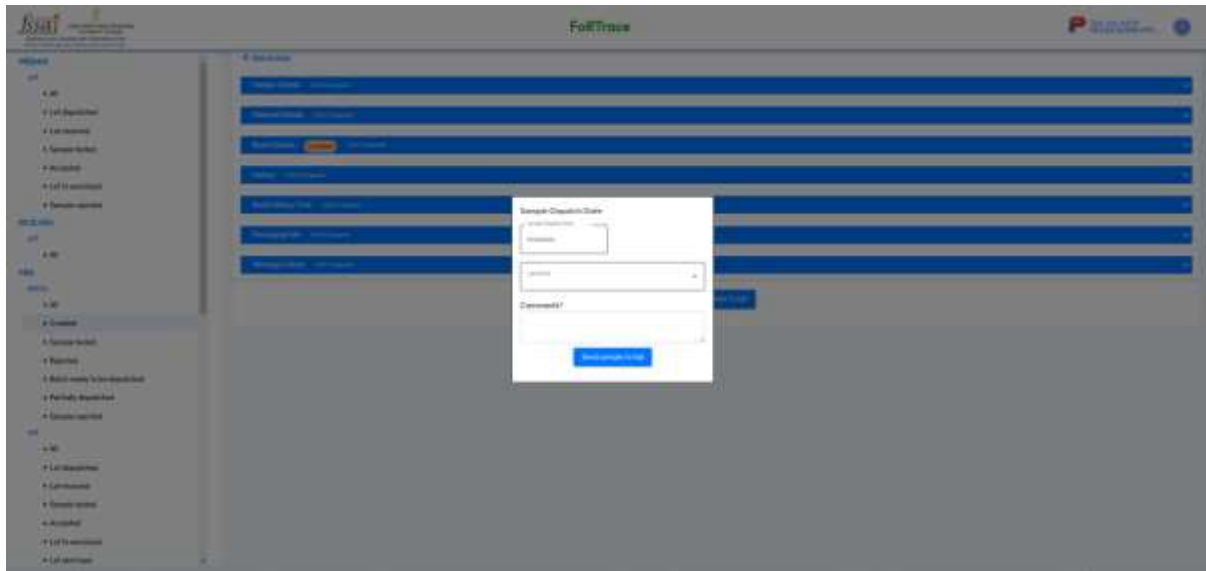

Figure 23: send sample to lab popup form

(vi) User can see success message as ‘sample has been sent to lab for testing’ as shown in below image.

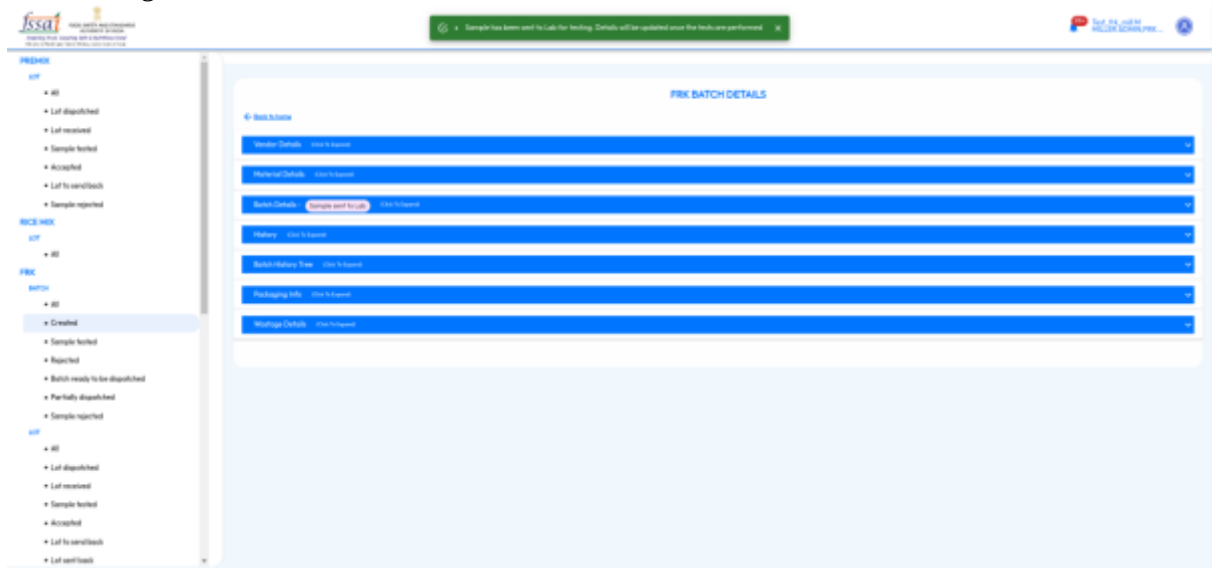

Figure 24: Success message after sample is sent to lab

- (vii) Once testing on sample is completed, And if the report is satisfactory then the stage of the batch will be changed to ‘Batch ready to be dispatched’.
- (viii) From the side menu, the user can click on ‘Batch ready to be dispatched’ to see list of batches in the grid with the stage of Batch ready to be dispatched as shown below.
- (ix) Clicking on the batch will populate the batch details which also includes test results.

Figure 25: Batch ready to be dispatched stage for FRK user

- (x) If the lab report is unsatisfactory, the stage of batch will be shown as 'Rejected'. Click on 'Rejected' from the side menu to see list of rejected samples from lab as shown below.

Figure 26: List of rejected samples

- (xi) User can click on 'Batch ready to be dispatched' in the side menu to see list of batches ready for dispatch.
- (xii) On clicking any particular batch from the list, FRK BATCH DETAILS page will open where the packaging information is to be added to dispatch the selected batch.
- (xiii) Expand packaging info and click on add, enter size, units and quantity. Click on save packaging info. For example, if batch is generated for 1000kg and if this has to be dispatched as 20kg bags of 50 units, the same details to be added in packaging details

section as shown below in fig 46.

(xiv) These bag details will be populated while dispatching the FRK.

User can also delete packaging info by clicking on the delete button.

The screenshot shows the 'FRK BATCH DETAILS' page. On the left is a sidebar with a tree view containing 'PREHEX', 'BICE INDEX', and 'FRK'. Under 'FRK', there are sub-items like 'All', 'Left dispatched', 'Left received', 'Sample tested', 'Accepted', 'Left to send back', 'Sample rejected', 'Created', 'Sample tested', 'Rejected', 'Batch ready to be dispatched', 'Partially dispatched', and 'Sample rejected'. The main area is titled 'FRK BATCH DETAILS' and has a 'Back to home' link. It contains several expandable sections: 'Vendor Details', 'Material Details', 'Batch Details' (with a sub-link 'Batch ready to be dispatched'), 'Batch Test Details', 'History', 'Batch History View', 'Packaging Info', and 'Weightage Details'. The 'Packaging Info' section is expanded, showing a table with columns: S.No, Size, Units, Quantity, and Actions. The table has one row with S.No '1', Size '10', Units 'kg', and Quantity '10'. There is a 'Details' link in the Actions column. Below the table are radio buttons for 'Dispatched' (selected) and 'To be dispatched'. At the bottom right is a 'Dispatch' button.

Figure 27: Added Packing Info

1.6 Dispatch:

- After adding package details in a batch, the option to Dispatch will be enabled at the end of the page.
- Click on **Dispatch** as shown in image below.

This screenshot is identical to Figure 27, showing the 'FRK BATCH DETAILS' page. The 'Packaging Info' section is expanded, and the 'Dispatch' button at the bottom right is now enabled and visible. The table in the 'Packaging Info' section remains the same with one row: S.No '1', Size '10', Units 'kg', Quantity '10', and a 'Details' link.

Figure 28: Dispatching FRK batch

A popup page will open as shown in the image below. Enter the following details:

- a) **Manufacture Lot number:** Enter manufacture lot number (if any).
- b) **Dispatch Date:** Enter dispatch date (present date is populated as default date).
- c) **Manufacture Select:** Choose between two options (Dropdown & License Number) for Miller vendor.
- d) **Dropdown:**
 - a. **Manufacturer type:** Select manufacturer type public/private. Public manufacturers are those Miller/Warehouse who are registered with Government and are eligible to generate Miller (Fortified Rice). Private manufacturers are those from the market who can trade for their own purposes.
 - b. **Manufacturer name:** For Public type, select the Miller/Warehouse vendor from the dropdown list.
- e) **License Number:**
 - a. **Manufacture License Number:** Enter a valid license number to search.
 - b. **Search Button:** Click on Search button after entering a valid license number.
 - c. **Manufacture Name:** It will be auto-populated after clicking search button.
- f) **Addition of baggage:** Click on 'add item' & select bag size & enter quantity.

User can delete added items and can re-enter the data at this stage, if required.

Once lot details are added, click on **Dispatch lot** as shown in below image and click on 'Yes' in popup to dispatch the lot to FRK Vendor.

Then success toast message will be displayed as shown below.

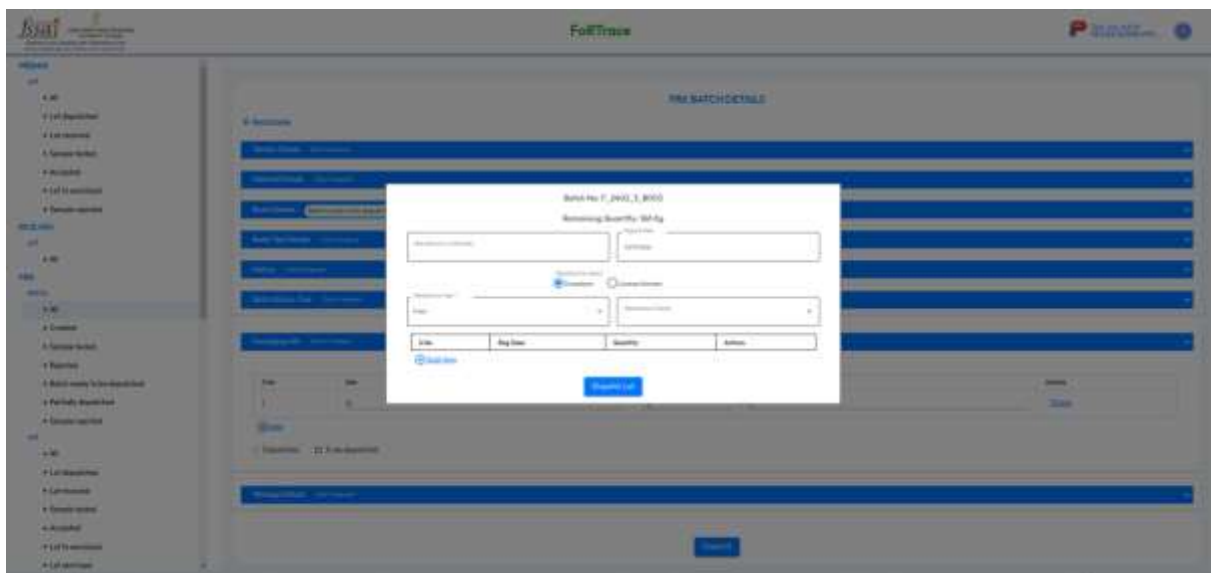

Figure 29: Dispatch a lot

Figure 30: Success toast for dispatching lot

If the batch is not fully dispatched, its status will be changed to partially dispatched. User can dispatch bags to multiple vendors also using Dispatch feature. The details of dispatched lots are shown under 'Usage Details' section in details page.

Figure 31: List of dispatched lot

Note:- Dispatched lot will be shown under "Packaging Info" section as shown below.

[illegible]

1.7.1 Adding New Users

-
- The screenshot displays the FortTrace 'USER CREATE' interface. On the left, a sidebar lists various user categories such as 'All verified', 'Rejected for review', 'Sample rejected', 'New', 'All', 'All rejected', 'All verified', 'Sample rejected', 'Rejected', 'Self-verified', 'Batch ready to be downloaded', 'Partially downloaded', 'Download rejected', 'New', 'All', 'All rejected', 'All verified', 'Sample rejected', 'Rejected for review'. The main area features a 'USER CREATE' header and a form with input fields for 'Username', 'Password', 'Email', 'Phone', 'Address', 'City', 'State', and 'Country'. A 'Create User' button is positioned at the bottom left of the form area.

- Enter First Name, Last Name, Username, Email ID, Password, Confirm Password.
- Click on Add role button.

S.No	Category	Role	Action
1			Delete

[Add Role](#)

Figure 36: After clicking on the add role button

- Add category, select role & click on “Add User” button.
- For **FRK**, Admin needs to provide 2 roles to user, i.e. Approver and User.
- **Category -> FRK & Role -> User**
- **Category -> FRK & Role -> Approver**
- After clicking on “Add User” button a successful toast will appear saying “User Created Successfully”.

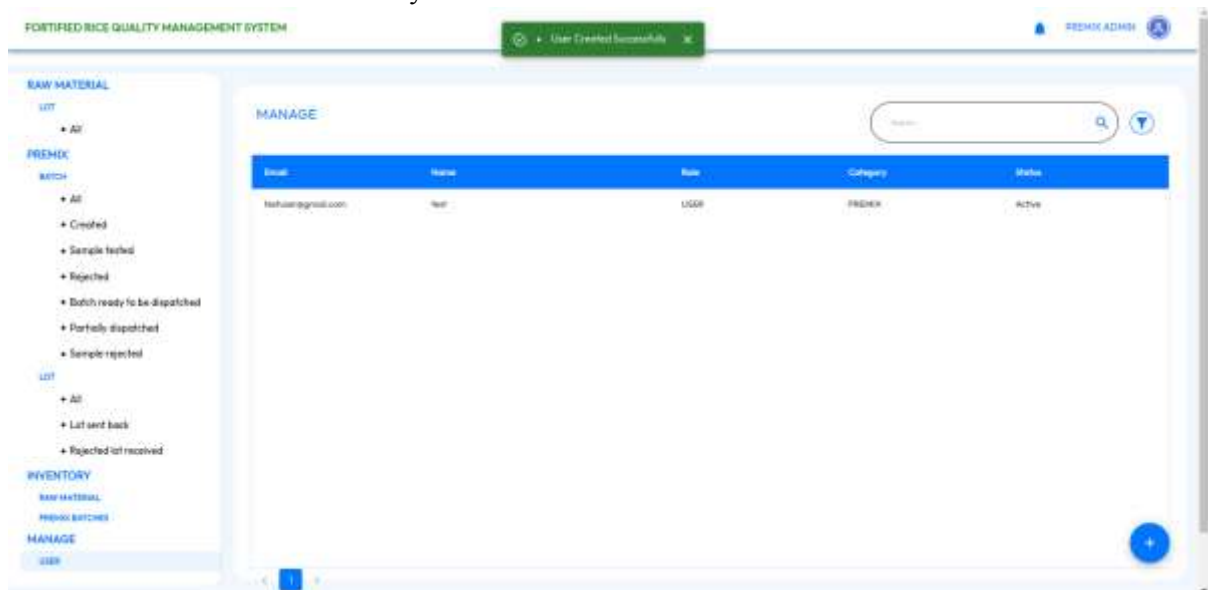

Figure 37: User Created Successfully message

- Admin can use these credentials for the newly created user, it will have only user access and will not have manage tab in the side-drawer.
- These newly created credentials should be used on this link: <https://frqms.fssai.gov.in/>
- The existing records will be shown to the newly created user.
