[Fortified Rice Traceability Application]

User Manual for Food Analysts/Food Laboratories

Lab users can login to the portal and can see the list of samples dispatched from vendors. Once the samples are received, then acknowledgement can be sent to the respective vendors. After that based on condition of sample, lab user performs the test and upload the test results and submit the report by clicking on 'Sample Tested'. If sample condition is not good, Lab user can reject the sample with comments and date of rejection.

The functionality is as mentioned below:

1.1 Login:

Enter the following url: <https://lab-frqms.fssai.gov.in/>

Figure 1: Login screen for lab user

The above login screen will be shown.

- **Username:** Enter a valid username.
- **Password:** Enter a valid password and click on Login.

User will be navigated to the landing page as shown in Figure 2.

As per the eligibility of the Lab, sample types (Premix samples, FRK samples and Miller samples) will be shown in the side menu.

In order to navigate this page:

- (i) Click on Premix to see list of Premix samples in the grid. Click on FRK to see FRK samples. Click on Miller to see Miller samples.

Figure 4: Success notification message on receiving sample

- (vi) Based on quality and physical condition of the sample, Lab may reject the sample if it is not in a condition to be tested. If the condition of sample is good, Lab will perform the test and submit the report as mentioned below.

1.2 Adding Lab Test Results:

Expand lab test details and add following details

- Test date:** Enter test date
- Performed by:** Enter name of person who will perform lab test.
- Enter test data:** Iron, folic acid, vitamin B12 in result column and enter test method followed.
- Attachments:** User can add attestation report, iron report and any other additional reports also.

After adding test results, click on 'Sample tested' to submit the test report to vendor.
